# WorkshopPLUS
# Power Platform for Administrators

Power Platform Licensing

# Conditions and terms of use

# Objectives

After completing this Learning, you will be able to:

**1**

**Understand license plans for....**
- ✓ Power Apps
- ✓ Power Automate
- ✓ Power Pages
- ✓ Power Virtual Agents

**2**

**Understand....**
- ✓ Capacity Add-Ons

# Recommended offers

## Power Apps
Application Development

---

**Premium**
$20 per user / month

## Power Automate
Workflow Automation

---

**Premium**
$15 per user / month

**Process**
$150 per bot / month

**Process Mining**
$5,000 per 100 GB of
data stored / month

## Microsoft Copilot Studio
Build copilots

---

**Per tenant capacity**
$200 for 25,000 messages
per tenant / month

## Power Pages
Web App Development

---

Tier 3 (100k+ users):
$50 for 100
authenticated users / month
or
$25 for 500
anonymous users / month

# Power Apps License Plans

# Power Apps standalone plans

## Power Apps Premium

- Entitles user to unlimited apps and websites
- $20 per user (or $12 per user w/2,000+ new licenses)

Build, modernize, and deploy unlimited applications for your team, department, or entire organization;

Best for businesses that want one license for users, regardless of the number of apps they need to run or websites they access

## Power Apps per app

- Entitles user to 1 app or website
- $5 per user/month

Best for businesses that want **to license users for each app they run or website they access,** with the flexibility to stack licenses for additional apps and websites.

## Power Apps per app pay-as-you-go

- Entitles user to 1 app
- $10 per active user/app/month

Best for businesses that want to **pay-as-you-go** for only the users who access a Power App one or more times in a month

Power Apps & Power Automate for Office 365 and Dynamics 365 allow users to customize & extend Office 365 and Dynamics 365 applications. For more information, please see Office 365 / Dynamics 365 sections in this deck.

# Summary of Power Apps

| Plans | Capabilities | Power Apps subscription — RECOMMENDED MOTION **Power Apps Premium** $20 per user/month (or $12 per user/month with 2K+ new per user licenses) | Power Apps Special FLW Offer — **Power Apps per user for Frontline Workers**[1] $3 per user/month (Lead Status) | Power Apps subscription — **Power Apps per app** $5 per user/month | Power Apps per app pay-as-you-go — **Power Apps per app meter**[2] $10 per active user/app/month | Power Apps use rights included with: **Select D365 Pro & Enterprise licenses**[3] | Power Apps use rights included with: **Select Microsoft 365 and Office 365 licenses** |
|---|---|---|---|---|---|---|---|
| **Power Apps** | Run custom apps | Unlimited apps | Unlimited apps | 1 app **or** 1 website | 1 app | Within same environ. as licensed D365 application(s)[4] | Unlimited |
| | Run custom websites | Unlimited websites | Unlimited websites | | | | |
| | Run workflows within the custom app[5] | ●[6] | ●[6] | ●[6] | ●[6] | ●[6] | ● |
| **AI Builder** | Service credits[7] | 500 credits | 0 credits | 250 credits | | | |
| **Power Platform connectors** | Standard connectors | ● | ● | ● | ● | ● | ● |
| | Premium and custom connectors | ● | ● | ● | ● | ● | |
| | On premises and cloud services data transfer | ● | ● | ● | ● | ● | |
| **Dataverse** | Full Dataverse access | ● | ● | ● | ● | ● | Dataverse for Teams only |
| | Create and access custom tables[8,9] | ● | ● | ● | ● | Pro limited to 15 per app | |
| | Dataverse Database capacity (Accrued) | 250 MB[10] | 0 MB | 50 MB[10] | | | |
| | Dataverse File capacity (Accrued) | 2 GB[10] | 0 MB | 400 MB[10] | | | |
| **Managed Environments** | Admin and governance at scale[11] | ● | ● | ● | | ●[6,12] | |

[1] Power Apps per user for FLW Requirements: 1) Licensed FLW user must meet the requirements for License Eligibility for Frontline Worker (FLW) Licenses per the Microsoft Product Terms, 2) Customer must own equivalent amounts of F-SKU licenses (MF1/MF3/OF3), 3) Minimum purchase of 2,000 licenses is required. The Power Apps per user FLW SKU available in lead status until January 1, 2024, via EA and EAS.
[2] Environments that are configured to use Power Platform pay-as-you-go, receive a one-time entitlement of 1 GB of Dataverse Database capacity and 1 GB of Dataverse File capacity per environment. Additional Dataverse Database, Dataverse File and Dataverse Log capacity can be purchased in increments of 1 GB.
[3] For exceptions to Dynamics 365 Field Service use rights for Power Apps users, refer to the Dynamics 365 Licensing Guide.
[4] Dynamics 365 Pro does not have use rights for Power Apps or Power Pages
[5] Power Automate use rights included with Power Apps do not include RPA functionality, which requires a separate purchase of Power Automate Premium.

[6] Within app context
[7] Cap on accrued capacity: 1,000,000 credits per tenant. For more AI Builder service credits, use the AI Builder capacity add-on.
[8] For Power Apps use rights with restricted tables and exceptions for case tables, see Restricted tables requiring Dynamics 365 licenses.
[9] For exceptions to Dynamics 365 Field Service use rights for Power Apps users, refer to the Dynamics 365 Licensing Guide.
[10] Dataverse Database and Database File capacity entitlements accrue at the tenant level. Additional Dataverse Database, Dataverse File and Dataverse Log subscription capacity can be purchased in increments of 1 GB via the Dataverse capacity add-ons.
[11] When Managed Environments is activated in a specific environment, all Power Apps, Power Automate, Power Virtual Agents, and Power Pages usage in that environment requires standalone licenses. Please review Power Platform Managed Environments for more details.
[12] Managed Environments is not included with Dynamics 365 Pro licenses.

# Power Apps per app pay-as-you-go (PAYG)

| Power Apps<br>per app pay-as-you-go |
| --- |
| $10 per active user per app/month |
| Best for businesses that want to **license active users for each app[1] they run and pay later based on consumption** |

- Entitlements: Dataverse database (1 GB) and file (1 GB) capacity entitlements are applied to each environment with pay-as-you-go billing enabled and are not granted for each monthly active user.

- Dataverse capacity add-on meters:
  - Dataverse Database capacity – $48 per GB/month
  - Dataverse File capacity – $2.40 per GB/month
  - Dataverse Log capacity – $12 per GB/month

  - [More information about how meters work.](#)

[1]Power Apps per app pay-as-you-go meter entitles licensed user to run 1 app or 1 page
Power Apps & Power Automate for Office 365 and Dynamics 365 allow users to customize & extend Office 365 and Dynamics 365 applications. For more information, please see Office 365 / Dynamics 365 sections in this deck.

# Power Automate License Plans

# Power Automate

| RECOMMENDED MOTION **Power Automate Premium** | RECOMMENDED MOTION **Power Automate Process** | RECOMMENDED MOTION **Process Mining add-on** | **Power Automate Hosted RPA add-on** | **Power Automate unattended RPA add-on** | **Power Automate unattended desktop flow run meter** | **Power Automate cloud flow or attended desktop flow run meter** |
|---|---|---|---|---|---|---|
| $15 per user/month | $150 per bot/month | $5,000 per 100 GB of data stored/month | $215 per bot/month | $150 per bot/month | $3.00 per flow run | $.60 per flow run |
| Enables licensed users to automate modern applications via API-based digital process automation (cloud flows) and legacy applications via UI-based robotic process automation (desktop flows) in attended mode | Licenses a single 'automation' bot that can be used for unattended desktop automation (robotic process automation, RPA) OR a digital process automation (DPA) flow that can be accessed by unlimited users in the organization | Capacity based license that enables rapid ROI for customers by identifying critical optimization opportunities and improving existing processes. Add-on to Power Automate Premium | Add-on to Power Automate Premium that allows users to run robotic process automation (RPA) as a service with hosted machine options | Add-on to Power Automate per user or per flow that enables a bot to run autonomously in a local remote desktop or virtualized environment. | Best for businesses that want to pay-as-you-go for each desktop flow run in unattended mode each month  Enables the setup of unlimited bots for concurrent runs | Best for businesses that want to pay as-you-go for each cloud flow run or desktop flow run in attended mode each month |

1 Process Mining qualifying prerequisite: Power Automate Premium. Multiple add-ons can be applied against a single qualifying prerequisite license.
2 Hosted RPA qualifying prerequisites: Power Automate Premium, Power Automate Process and Power Automate per flow. Multiple add-ons can be applied against a single qualifying prerequisite license.
3 See technical documentation for definitions of each flow type.
4 Within app context. For both triggers and actions, flows within an embedding app, can connect to any data source within the use rights of the embedding application and directly with the embedding application
5 Via Power Automate desktop only; a free application not intended for business-critical functions, with no SLA or Microsoft support. cloud flows, standard/premium connectors, orchestration (scheduled or automatic triggers for desktop flows, attended or unattended, combine cloud flows + desktop flows in a single automation), sharing desktop flows, developing in a different environment than the default, Automation Lifecycle Management (ALM), monitoring, execution logs are not included

6 The Power Automate Premium license includes the Process Mining desktop app with advanced analytics and optional Power BI customization with a separate purchase of Power BI. Process Advisor that comes with Power Automate Premium licenses includes out of the box process mining capabilities (pre-built templates) with very limited customization.
7 50 MB of Process Mining data storage per user license, cap on accrued capacity: 100 GB per tenant.
8 Desktop flow connector is included. (This desktop flow connector is not included in Windows licenses.)
9 Cap on accrued capacity 1,000,000 credits per tenant. Additional AI Builder capacity can be purchased per 1M service credits for $500/month via the AI Builder capacity add-on.
10 Dataverse Database and File subscription capacity is pooled at the tenant level. Additional Dataverse Database, Dataverse File and Dataverse Log subscription capacity can be purchased in increments of 1 GB.
11 When Managed Environments is activated in a specific environment, all Power Apps, Power Automate, Power Virtual Agents, and Power Pages usage in that environment requires full licenses.
12 Managed Environments is not included with Dynamics 365 Pro licenses. Please see Power Platform Managed Environments for details.

All pricing subject to change, please consult price list for actual pricing.

# Power Automate (Flow) within app context

## Definition of Flow within app context

For both triggers and actions, Flows included within an embedding application can connect:

- To **any** data source within the use rights of the embedding application
- Directly with the embedding application (via built in trigger/action)

## Example: Flow embedded within Power Apps

**Example: Flow within app context.**

User with a standalone Power Apps license runs an app that uses SQL DB as the data source and includes Flows that:

- Read from OR write to SQL DB.
- Use a built-in Power Apps trigger and/or action.
  For example: Send a push notification to the app.

**Example: Flow NOT within app context.**

The same user now also wants to use a Flow that updates an Oracle database and:

- Is completely unrelated to the Power Apps app
- Does not interact in any way with the Power Apps app (or its data sources)

This user will then require a standalone flow.

NOTE: Flows that are triggered from the app are automatically considered as being in context of the app. If automated or scheduled cloud flows are created to support the app and are in context of an app, link the flow to the apps using a PowerShell script. Once the flow is linked, a dependency is established between the app and the flow, and they can be managed together. More info here.

# Power Automate pay-as-you-go (PAYG)

## Overview

- The meter charges based on the number of flow runs, regardless of how many users have access to the flow
- In pay-as-you-go environments flow runs by users with Power Automate per user, per user with attended RPA and by flows with per flow subscription licenses are not charged to pay-as-you-go when usage is within license entitlements.
- The Power Automate Unattended add-on and pay-as-you-go meters cannot be mixed, every unattended flow run in the pay-as-you-go environment will be charged to pay-as-you-go.

## When to position the Power Automate per flow plan

Best for businesses that want the flexibility to pay only when a flow runs

| License by Cloud flow run | License by Desktop flow run (attended) | License by Desktop flow run (unattended) |
| --- | --- | --- |
| $0.60 per flow run | $0.60 per flow run | $3 per flow run |
| Pay for each cloud flow run | Pay for each desktop flow (attended mode) run | Pay for each desktop flow (unattended mode) run |

- [Pay-as-you-go plan overview - Power Platform | Microsoft Learn](#)
- [pay-as-you-go meter](#)

# Summary of Power Automate for Windows

| Plan and Capabilities | | Power Automate use rights within Windows licenses |
|---|---|---|
| Execute flows[1] | Cloud flows (Automated, instant, and scheduled flows) | - |
| | Business process flows | - |
| | Attended desktop flows | ● Via Power Automate desktop[2] only |
| | Unattended desktop flows | - |
| | WinAutomation client capabilities | - |
| Share and collaborate | Applies to flows included in the license | - |
| Connect to your data | Standard connectors | - |
| | Premium and custom connectors | - |
| | On premises data gateway | - |
| Store and manage data | Dataverse (formerly Common Data Service) use rights | - |
| Enterprise management and security | Centralized administration in PPAC | Basic report[3] |

[1] See technical documentation for definitions of each flow type.

[2] Power Automate Desktop in Windows is a free application you install on your PC that lets you login and create desktop flows. This application should not be utilized for business-critical functions as there is no SLA or Microsoft support. If Power Automate is business critical, you should purchase the appropriate Power Automate license which includes support.

[3] Power Automate desktop flows basic usage reports available via Power Platform Admin Center

# Power Pages License Plans

[4] Per license capacity
[5] When Managed Environments is activated in a specific environment, all Power Apps, Power Automate, Power Virtual Agents, and Power Pages usage in that environment requires standalone licenses. Please see Power Platform Managed Environments for details.

All pricing subject to change, please consult price list for actual pricing.

# Microsoft Copilot Studio License Plans

# Microsoft Copilot Studio

## Microsoft Copilot Studio

$200 per tenant/month*
Tenant-wide capacity license sold in capacity packs.
1 capacity pack = 25,000 messages/month

**Offer Details**
- Gen AI: AI-enabled conversations
- Copilot in Microsoft Copilot Studio: Create and iterate on chatbot topics using expanded natural language capabilities
- Power Automate for Microsoft Copilot Studio: Cloud flows –
Create automated, instant and scheduled flows within context of Microsoft Copilot Studio bots
- Connectors: Standard, Premium and Custom connectors
- Dataverse for Microsoft Copilot Studio: Dataverse Default Capacity
  - 5 GB Database Capacity
  - 20 GB File Capacity
  - 2 GB Log Capacity

*Available in Lead Status only October 1, 2023 – November 30, 2023 (VL: Commercial, Pub Govt, EDU)
General Availability - December 1, 2023 (Volume Licensing, CSP, Web Direct)

# Summary of Microsoft Copilot Studio

| Plans | Capabilities | RECOMMENDED MOTION<br>Microsoft Copilot Studio<br>$200 per tenant/month* | Microsoft Copilot Studio for Teams<br>use rights with select Microsoft/Office 365 licenses |
|---|---|---|---|
| **Microsoft Copilot Studio** | Deploy chatbots in all channels | ● | Teams only |
| | Messages/tenant/month[1] | 25,000 Messages | Unlimited[2] (Teams only) |
| | Gen AI:  AI-enabled conversations<br>(Consumption rate of 2 messages)[3,4] | ● | |
| | Copilot in Microsoft Copilot Studio - Create and iterate on chatbot topics using expanded natural language capabilities[5] | ● | ● |
| **Power Automate for Microsoft Copilot Studio** | Create cloud flows (Automated, instant and scheduled flows) within the context of Microsoft Copilot Studio bots | ● | |
| **Power Platform connectors** | Standard connectors | ● | ● |
| | Premium and custom connectors | ● | |
| | On premises and cloud services data transfer | ● | |
| **Dataverse for Microsoft Copilot Studio** | Full Dataverse access | ●[6] | Dataverse for Teams |
| **Managed Environments** | Admin and governance at scale[7] | ● | |

[1] Microsoft Copilot Studio messages are the common currency across Microsoft Copilot Studio capabilities. A billable message is a message sent to the bot triggering an action and/or response. (e.g., A user asks bot when a store is open (message), and bot replies with store hours.)
[2] Messages in Microsoft Copilot for Teams are unlimited per tenant/month. A service limit of 10 sessions per user/24 hours across all bots in a tenant will be enforced. See Quotas, limits, and configuration values for more information.
[3] Message Consumption rates: 1) Regular (Non-generative AI) = 1 message, 2) Generative AI (Gen AI) answers over your data = 2 messages . Customers can use a mix of Regular and Generative AI messages.

[4] More information on Generative Answers capability can be found here.
[5] See Create with Copilot. Available only in the United States.
[6] Microsoft Copilot Studio Dataverse default capacities: Dataverse Database 5 GB, Dataverse File 20 GB, Dataverse Log 2 GB
[7] When Managed Environments is activated in a specific environment, all Power Apps, Power Automate, Microsoft Copilot Studio, and Power Pages  usage in that environment requires standalone licenses.
* Available in VL Lead Status only October 1, 2023 – November 30, 2023; General Availability in VL, CSP and Direct December 1, 2023

# Capacity Add-Ons

# Power Platform Requests

## Overview

The Power Platform Requests add-on increases Power Platform Requests for Power Apps, Power Automate, Power Virtual Agents, and Dynamics 365 users/workloads by another 50,000 requests per 24 hours. Multiple capacity add-ons can be assigned to increase limits.

**Note:** Service limits are for service protection purposes and set to high thresholds so that users with normal usage patterns will be well within the limits. Please see http://aka.ms/platformlimits for more details

## Offer Details

| Power Platform Requests add-on | |
|---|---|
| **Offer name** | Power Platform Requests |
| **License type** | **Dedicated** capacity per user or flow |
| **Pricing** | $50/month for 50,000 requests/24 hours |

# AI Builder capacity add-on

| Offer Details | |
|---|---|
| **Offer name** | AI Builder capacity add-on |
| **License type** | Tenant wide capacity license |
| **Pricing** | $500 per month - Each subscription includes 1M service credits |
| **What are service credits?** | Common currency across AI Builder capabilities<br>Usage of AI Builder services consumes purchased service credits |
| **Qualifying base licenses** | Power Apps, Power Automate and Dynamics 365 licenses |

## Estimating # of units to purchase

A calculator is available to help estimate AI Builder Capacity add-on units to be purchased

- Estimates are based on the anticipated usage of various AI Builder services
- https://powerapps.microsoft.com/en-us/ai-builder-calculator/

# Dataverse capacity add-on

## Overview

Apps or flows utilizing Dataverse will consume varying quantities of Database Capacity, File Capacity, and Log Capacity and may require different kinds of Power Apps and Power Automates environments. Apps may utilize flows, or flows may be run separately from apps.

| Offer Details | |
|---|---|
| **Dataverse Database capacity (1GB)** | 40$ per month |
| **Dataverse File capacity (1GB)** | 2$ per month |
| **Dataverse Log capacity (1GB)** | 10$ per month |

Please note that Dataverse capacity add-ons **do not apply** to Dataverse for Teams scenarios (i.e., when a Dataverse for Teams environment reaches its limit, customers need to step up to standalone Power Apps, Power Automate, or Power Virtual Agents plans for additional capacity).
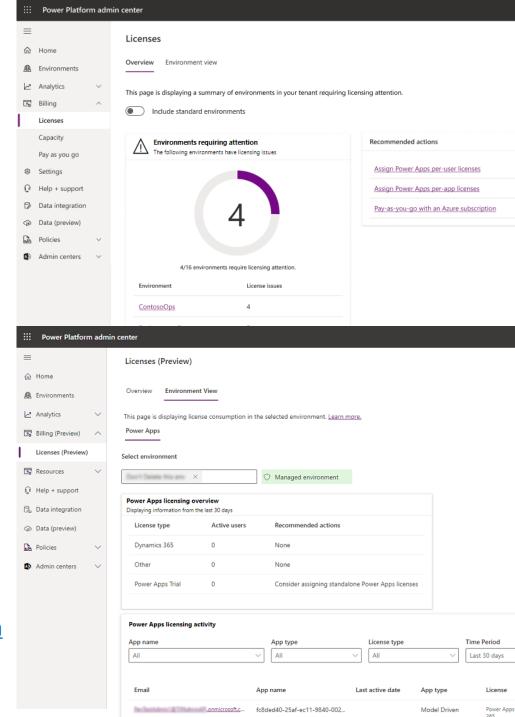

# New Licenses reports (Preview)

New Bill (Preview) > Licenses (Preview) option in the left menu in https://aka.ms/PPAC

- **Overview** tab displays a summary of environments in the tenant requiring licensing attention.
  - Can include standard environments
- **Environment view** displays license consumption in the selected environment.

Get answers to questions like:

1. How many licenses have been assigned to users?
2. Which users have these licenses been assigned to?
3. What type of licenses are users utilizing to launch custom apps?
4. Which apps are driving which type of license usage?
